

Internet safety

BE SMART.....

- Keep your personal information private
- Be careful about what you share in profiles on social media
- Who can see the photos you share?
- Check a company's privacy policy before buying
- Watch out for emails tricking you into giving personal information
- Check your online accounts carefully
- Remember that companies know you are using the internet
- Report identity theft
- Keep your accounts secure
- Choose a password no-one will guess
- Don't reuse passwords
- Keep your passwords in a safe place
- Watch out for software that could damage your computer
- Think before opening email attachments
- Are free programmes you are looking at genuine?
- Keep your virus software up to date
- Watch out for fraud
- Be on the lookout for sexual predators
- Keep your experience enjoyable and safe
